Offline Software for analysis

●DS-3000

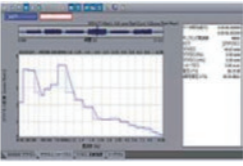

The DS-3000 can import the WAVE file which has been recorded by LA-7000 series and LA-0704, and perform FFT analysis offline. The unit is automatically calibrated at the time of installation.

●IIR Filter (OS-2000 series)

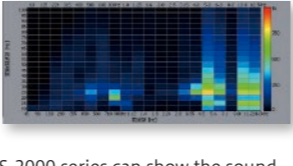

The OS-2000 series can import the WAVE file which has been recorded by LA-7000 series and LA-0704. You can hear the change by increasing or decreasing the frequency level.

●Sound Quality Evaluation (OS-2000 series)

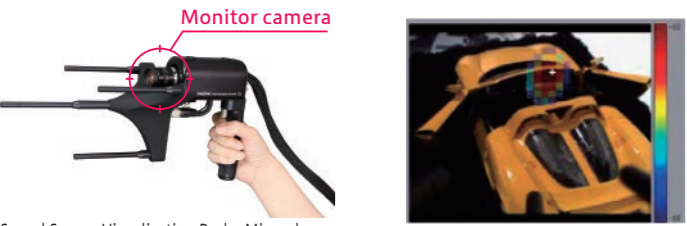

The sound quality evaluation software can import the WAVE file which has been recorded by LA-7500 and LA-0704, and calculate the loudness, non-constant loudness, sharpness, and fluctuation strength.

●Fluctuation Sound Analysis (OS-2000 series)

OS-2000 series can show the sound feature by two parameters of frequency and fluctuation frequency. This software enables wide frequency range of sound quality evaluation that cannot be performed by "roughness" and "fluctuation strength" fields.

CAT.NO.1643-05E Printed in Japan 19X (LI) 0.3K

Easy to operate

4.3 inch color LCD

Clear and easy to see a display of overlapping. When the instantaneous value exceeds, the bar graph turns red and the letter of OVER is left as a measured history.

Starts recording with one-touch operation

Calculation and recording are started just by tapping button(for auto memory) with a finger.

Listening function

You can measure while listening to the sound. It enables you to realize and experience the sound, not only as simple numerical values but also as a real feeling. Moreover, you can listen to only the intended sound more clearly through filtering by bandpass filter. By aiming the microphone (sound level meter) toward the direction where the sound is heard loudly, the sound probing is easily performed. (Refer to the Function page.)

Easy to hold

Compact

Achieves 35 % of size-reduction in volume of conventional model. Easy-to-hold design.

Short lanyard for portable use

The short lanyard provided as an accessory prevents the sound level meter from slipping down.

Easy to use

Intuitive operation by a touch panel

It provides intuitive operation in easily understandable manner by even a beginner touching the sound level meter for the first time. You can select and change items on the display including calculation, range, measurement time by tapping the panel.

Language selection

Language used on the display (menu, error message etc.) is selectable (English/Japanese).

USB power supply allows long time measurement

Approx. 12 hours of continuous operation by alkaline battery cells(depends on the selected mode). Longer continuous operation is allowed by USB bus power. USB gets preference over battery cells when both USB and battery cells are used together. The battery power supply is automatically selected by removing USB connection.

Windscreen correction function

When measuring with windscreen, the influence of the attachment can be corrected by this function.
*Applicable to IEC 61672-1 with a state a windscreen attached.
*The use without a windscreen correction is available.

Capturing function

Captures the displayed screen by pressing Power key and Home key simultaneously.

Home key leads you to return to the first page

Pressing Home key returns the display to the home screen. Helpful to go back to the home screen quickly from the deep hierarchy that you are operating.

External power supply ON/OFF function

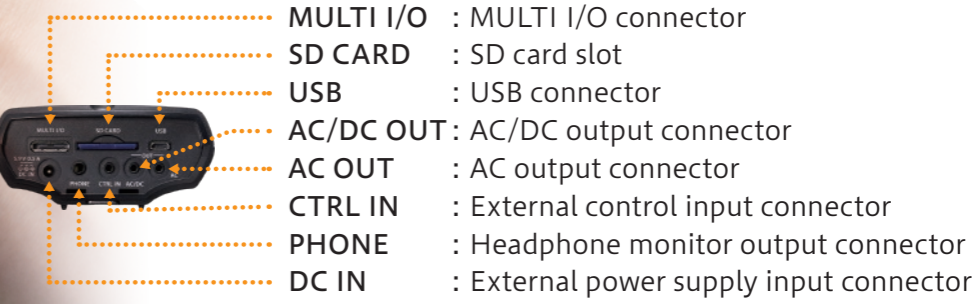

When the LA-7000 series is used being incorporated in equipment, the ON/OFF power operation can be interlocked to an external power supply.
* The battery cells should be removed.
