# INTRODUCING EMERALD REMOTE APP

UNIQUE TO EMERALD – KVM ACCESS FROM WINDOWS® 10 APPLICATION

The Emerald™ Remote App is new software from Black Box that allows users to access their Emerald connections, both physical and virtual, from any Windows 10 device. The Remote App increases mobility and device access and monitoring on the Emerald System. It delivers full HD video for administrators, and multiple connections can be launched simultaneously to facilitate multiple device management.

The Emerald Remote App is the first software receiver that allows users to connect to Emerald KVM Transmitters and virtual machines securely.

HIGH-QUALITY USER EXPERIENCE
Supports HD video up to 1920 x 1200 and provides access to both physical and virtual machines.

NO HARDWARE REQUIRED
Works on any laptop, tablet or desktop device running Windows 10.

MULTIPLE CONNECTIONS
Open connections to multiple devices simultaneously. This allows you to control and monitor many systems from your own device. Purchase the appropriate number of simultaneous connection licenses to meet the needs of your application.

SECURITY
All access is authenticated by Boxilla™ in real time, ensuring the Emerald administrator has full control and can define only the users required to have remote access.

WAN SUPPORT
Users can connect from anywhere with access to all connected resources, once they can authenticate via Boxilla.
