

# savvius Insight™

## Real-time enterprise-class network management for smaller networks

### Challenge

Networks are important to businesses of all sizes and locations from the data center to the network edge. Smaller networks and remote sites need powerful, affordable solutions for real-time visibility into network and application performance.

### Solution

Savvius Insight is the first affordable mini appliance that provides packet-based network management and monitoring at branch offices and independent locations. Savvius Insight allows businesses to extend enterprise-class solutions all the way to the network edge, capturing network packet information involving flows, conversations, apps, protocols, and performance required to better manage and troubleshoot these locations.

### Applications

- Savvius customers will find Savvius Insight provides analytics in an economical, pre-configured all-in-one appliance.
- Enterprise and Service Providers can extend multi-segment analysis and visibility from the data center to the network edge.
- Small and Medium Businesses find Savvius Insight's enterprise-grade network analytics help maintain network performance and enable remote troubleshooting.
- Splunk Users gain intelligence with Savvius Insight by adding network machine data to their Splunk deployments.

### Feature Highlights

- Supports 100 megabit-class networks.
- Uses an external power adapter and has no moving parts.
- Pre-loaded with Savvius Insight analytics software running on Linux.
- OmniPeek Insight network performance management running on Windows.
- Splunk Forwarder to gather and send data to a Splunk server, if desired.

### Hardware

- Four-core Intel Atom processor with 8GB RAM and 128GB SSD.
- Bi-directional bridge ports with automatic bypass for inline use.
- Dimensions (W x H x D) 177 x 44 x 145.5 mm (optional rack mounting kit available).

### About Savvius

Savvius, Inc. brings 25 years as a leader in network performance and security forensics solutions to customers in more than 60 countries worldwide. Savvius's Omnipliance®, OmniPeek®, Savvius™ Insight, and Savvius™ Vigil products enable network and security professionals to identify, understand, and respond to network performance issues and resolve security breaches quickly and comprehensively. Savvius customers include Apple, Boeing, Cisco, Microsoft, and over half of the Fortune 100. For more information, please visit [www.savvius.com](http://www.savvius.com).
