

Are you that enthusiastic technical account manager in fiber optics for the Netherlands?

What will you be doing with us

To serve our customers even better, we are expanding our fiber optics team. You will be the product specialist in the field of fiber optics, visiting (potential) customers in the Netherlands. Together with our team, you look for the most suitable test- & measurement solutions for our customers, especially in the high-tech industry, datacenters, telecom, contractors and the installation sector

Who are we looking for

You are an enthusiastic personality, technically driven and communicate fluently. Together with our own team and specialists from our suppliers, you look for the best solutions for our customers, cooperation is in your DNA!

You are responsible for to maintain contact and work out strategic deals with our main suppliers.

Based on your expertise, you also provide technical demonstrations and training to our customers. Together with the marketing team, you work on challenging marketing actions within your technology area.

Knowledge of fibre optics and the data centre sector and technical knowledge of fibre systems is an added value.

Naturally, you have sufficient language skills in both speech and writing to perform your job convincingly in Dutch and English.

Our offer

You will join a rapidly growing and healthy company with a rejuvenated team of colleagues that guarantees challenging projects. Attractive and motivating terms of employment in accordance with with your profile and experience.

We reward you in line with the market and offer a result-oriented bonus scheme on top of that. You can count on a pleasant working atmosphere in a team of driven colleagues who consider open communication important.

Great independence in which you set your own appointments. Naturally we would like you to regularly refuel during well-earned leave and you can make use of a home working arrangement. Naturally, we provide you with a lease car, laptop and telephone.

If you want to know everything, you really should talk to us.
